## PROFILE

Software Engineer with 1.5+ year of professional experience in full-stack web and mobile application development, backed by internships in software engineering, data science, and AWS AI/ML. Experienced in building scalable production applications using React, TypeScript, Node.js, Express.js, PostgreSQL, Redis, Docker, and React Native. Skilled in designing REST APIs, authentication systems, payment gateway integrations, cloud-based solutions, and data engineering pipelines. Strong foundation in data structures, system design, machine learning, and software engineering principles. Passionate about solving complex problems, delivering high-quality software, and continuously learning emerging technologies while contributing effectively in collaborative, fast-paced engineering teams.

## EDUCATION

| Degree | Subjects | Institution | Year | CGPA |
|---|---|---|---|---|
| B.Tech | Computer Science and Engineering | Vignana Bharathi Institute of Technology, Hyderabad | 2025 | 9.12 |
| Higher Secondary (XII) | Physics, Chemistry, Mathematics | Narayana Junior College, Telangana | 2021 | 93.80 |
| Secondary (X) | - | SSD Grammar High School, Telangana | 2019 | 9.20 |

## EXPERIENCE

- **Software Engineer** *[Instaresz Pvt. Ltd., Hyderabad] (on-site)* *Feb 2025 – Present*
  - Completed a 6–month internship and transitioned to full–time in September 2025.
  - Contributing to multiple Jusbook platforms including: *jusbook.com*, *platform.jusbook.com*, *marketing.jusbook.com*, *video.jusbook.com*.
  - **Developed the official Jusbook Mobile Application** from scratch, including UI, API integrations, authentication, and deployments. The app is available for download directly from *jusbook.com*.
  - Built scalable frontend applications using **Vite + TypeScript**, TanStack, Redux, shadcn/ui, and TailwindCSS.
  - Implemented backend modules in **Express.js** including routes, controllers, middleware, authentication, and API integrations.
  - Designed and deployed a complete **OTP verification system** (email SMS) and an automated **email service system**.
  - Integrated secure payment workflows using **Razorpay** and **Stripe**.
  - Implemented OAuth login with **Google, Microsoft, and GitHub**.
  - Worked with **PostgreSQL** and **Redis** for schema design, caching, sessions, and optimization.
  - Used **Docker** for local development, testing, and production deployment.
  - Resolved complex **GitHub merge conflicts** and contributed to stable CI/CD workflows.
  - Worked with the **Tara AI model** for intelligent features and automation.
  - Built and maintained **data engineering pipelines** for analytics and reporting.
  - Performed CRM data transformation and migration from **Zoho datasets**.
- **Engineering Trainee** *[coding.Studio(), Hyderabad]* *Sep 2022 - Jan 2025*
  - Participated in peer-to-peer learning to improve technical abilities while working together on real-time projects.
  - Gained hands-on experience in software development and project management.
  - Concentrated on creating solid solutions and streamlining procedures
- **Data Scientist Intern** *[CodersCave, Virtual]* *Aug 2023 - Sep 2023*
  - Performed preliminary data analysis, yielding useful insights on worldwide trends in terrorism.
  - To precisely identify emotions from audio data, a speech emotion identification model was developed utilizing the LSTM MODEL.
  - To improve cybersecurity safeguards, a spam email prediction system was implemented.

- Developed a prognostic tool to help diagnose breast cancer early, facilitating medical diagnosis

- **AWS AI-ML Intern** *[AICTE, Virtual]* *Dec 2022 - Feb 2023*
  - Mostly focused on AWS-powered AI and machine learning applications, and well-versed in cloud-deployed AI solutions.
  - Utilized AWS services including Amazon Rekognition for image and video analysis, AWS Lambda for serverless execution, and Amazon SageMaker for building models.Moreover, AWS Glue was used to improve machine learning workflows through data integration and ETL operations.

## SKILLS

**Interpersonal Skills:**
Communication, Teamwork, Problem-Solving, Time-Management, Adaptability, Project-Management

**Technical Skills:**

- **Programming Languages:** Python 3.x, JavaScript (ES6+), TypeScript, SQL, C#, Java
- **Frontend Development:** Vite, React, TypeScript, Redux, TanStack Query, shadcn/ui, TailwindCSS
- **Backend Development:** Node.js, Express.js (routes, controllers, middleware, authentication), RESTful API Design
- **Mobile Development:** React Native (Jusbook Mobile App – production deployed)
- **Machine Learning & AI:** TensorFlow 3.x, PyTorch, Scikit-learn, XGBoost, OpenCV, NLP (NLTK, SpaCy, Transformers), Model Deployment
- **Data Engineering:** Apache Kafka, PySpark, Data Warehousing, ETL Pipelines, Stream Processing, Dask
- **Databases:** PostgreSQL, Redis (caching & sessions), MySQL, MongoDB, Microsoft SQL Server
- **Cloud & DevOps:** Docker, Git, GitHub, GitLab, CI/CD (basic), AWS (EC2, S3, Lambda – working knowledge)
- **Authentication Systems:** OAuth 2.0 (Google, Microsoft, GitHub), JWT Authentication, Session Management
- **Payment Gateways:** Razorpay, Stripe (Payment flows, webhook handling, transaction APIs)
- **Messaging & Notifications:** OTP Systems (email & mobile), Email Automation (SMTP), Notification Workflows
- **Data Visualization:** Matplotlib, Seaborn, Plotly, Power BI
- **Project Environments & Tools:** Jupyter Notebooks, VS Code, Visual Studio, MS Excel, MS PowerPoint
- **Core CS Concepts:** OOP (Inheritance, Polymorphism, Encapsulation), Multithreading, Exception Handling, Data Structures & Collections
- **SQL Expertise:** DDL, DML, DQL, Joins, Indexing, Constraints, Normalization, Query Optimization

## PROJECTS

- **Jusbook Schedular App(prod.jusbook.com** *[Vite | TypeScript | React | TanStack | Redux | TailwindCSS | shadcn/ui | Express.js | PostgreSQL | Redis | Docker]* *Feb 2025 – Present*
  - Contributed to multiple Jusbook platforms: *jusbook.com*, *platform.jusbook.com*, *marketing.jusbook.com*, *video.jusbook.com*.
  - Engineered frontend modules using Vite + TS with state management using TanStack and Redux.
  - Built backend modules (routes, controllers, middlewares) using Express.js and optimized API performance.
  - Implemented OTP authentication (email + mobile), automated email system, and secure OAuth login (Google, Microsoft, GitHub).
  - Integrated Razorpay and Stripe payment gateways for secure transactions.
  - Designed PostgreSQL schemas and implemented Redis for caching and session management.
  - Deployed and containerized services using Docker in development and production pipelines.

- **Jusbook Mobile Application** *[React Native | TypeScript | REST APIs | Authentication | Pay Integration]* *2025*
  - Developed the official Jusbook mobile app, downloadable directly from the Jusbook platform.
  - Built complete UI screens, navigation flow, forms, and dashboards using React Native + TypeScript.
  - Implemented secure login flows, OTP verification, OAuth login, and session handling.
  - Integrated video modules, booking flows, and user profile management using custom REST APIs.

- Added Razorpay/Stripe payment integration for mobile transactions.
- Ensured high performance and smooth UI/UX on Android devices.

- **CRM Data Engineering Migration Pipeline** *[Python | Pandas | SQL | ETL Pipelines | Zoho CRM]* *2024 – 2025*
  - Designed automated ETL pipelines to clean, transform, and migrate CRM datasets from Zoho.
  - Performed feature engineering, data deduplication, and anomaly detection to improve data quality.
  - Developed scripts to map legacy CRM fields to the new schema and ensured zero-loss migration.
  - Generated analytics dashboards to support business decisions and campaign optimization.

- **Brain Tumor Detection System** *[Python | TensorFlow | OpenCV | Flask | MySQL]* *Jul 2024 - Present*
  https://github.com/AnilKumar658
  - Developed using deep learning techniques and MRI data, this system enhances the accuracy and speed of tumor detection, crucial for timely medical intervention. Achieved a detection accuracy of 95%.

- **Fake News Detection** *[Python | SKLearn | Numpy | Seaborn]* *Dec 2022 - Jan 2023*
  https://github.com/AnilKumar658
  - Applied machine learning algorithms to identify and filter out fake news, improving the reliability of information on social media. Improved accuracy in detecting fake news to 92%.

- **Student Data Analysis** *[SQL | Power BI]* *Aug 2023 - Sep 2023*
  https://github.com/AnilKumar658
  - Analyzed educational data to derive insights and patterns, contributing to better decision-making in academic settings. Provided actionable insights that contributed to improved decision-making in educational strategies and policies, resulting in a 15% increase in student engagement.

## CERTIFICATIONS

1. **Salesforce AI Associate**, Salesforce, Issued: November 2024; *Certified in foundational AI concepts, demonstrating knowledge of AI applications within Salesforce ecosystems, including AI ethics, machine learning, and data-driven decision-making. Credential ID: 5221856; Verification: sforce.co/verifycerts.*
2. **Certified DotNet Full Stack Developer**, Wipro TalentNext, Issued: October 2024; *Demonstrates proficiency in full-stack development using .NET technologies.*
3. **AWS Academy Graduate - AWS Academy Data Engineering**, Amazon Web Services Training and Certification, Issued: October 26, 2023; *Showcases expertise in data engineering concepts and AWS tools.*
4. **Zero Trust Certified Associate (ZTCA)**, Zscaler, Issued: April 2024; Expires: April 2027; *Indicates proficiency in zero trust security principles.*
5. **Fundamentals of Generative AI**, GUVI Geek Networks, IITM Research Park, Issued: September 2024; *Reflects knowledge of generative AI techniques.*

## ACHIEVEMENTS

- **Top 5 in Code Ninjas Contest** – Excelled in competitive programming with strong problem-solving skills.
- **Master Badge in Data Structures and Algorithms** – Demonstrated advanced understanding of DSA through Guided Path.
- **Software Engineer Intern at HackerRank** – Gained hands-on experience in real-world software engineering.
- **97.08% in Naukri Young Turks Round 1** – Achieved a high score in aptitude test evaluating logical reasoning, numerical ability, and verbal skills among top 8L candidates.
- **Ranked #3027 in Naukri Campus Young Turks (Data & AI)** – Achieved high placement among top 5L candidates.
- **Specialist Badge in Python Basics** – Recognized for foundational programming skills in Python.
